

CONTINUOUS SYSTEM SECURITY

Whistleblower System Web Application

HiSolutions AG hereby confirms the successful completion of a penetration test of the Got Ethic web application "Whistleblower System" in March 2019. The security audit sought to identify vulnerabilities and ensure the confidentiality, integrity and availability of the system and its data. The security test covered the public facing parts of the application and was carried out with an emphasis on the OWASP Top 10 risk schema. The audit did not reveal any critical vulnerabilities and all substantial issues identified have been fixed as of this time.
